

out of this background of commercial machines

"WHEREVER FOOD IS PREPARED, SERVED OR SOLD"

A man and a woman in a kitchen with a white dishwasher full of dishes.

comes the world's
finest automatic
dishwasher for the home...
KitchenAid®
by Hobart

for sixty years . . .

For over 60 years the finest hotels, restaurants and hospitals in the world, regardless of size, have depended upon Hobart dishwashers to maintain their reputations for spotless efficiency in food serving operations. It was Hobart who pioneered and perfected the dishwashing features and principles that have proved so dependable, economical and efficient. Through those six decades the name of Hobart has become synonymous with quality machines that are engineered to do a complete and thorough job today, tomorrow and for years to come . . . with minimum service.

With a background like this, who is better qualified to build a really efficient home dishwasher? Hobart's determination to *always* build the best possible product has been carried through to the home dishwasher—*KitchenAid*. It, too, is engineered to do a job, not to meet a price. Workmanship and quality of materials are never sacrificed. *KitchenAid* utilizes the same tried

and proved revolving power wash principle that has been transforming mountains of soiled tableware into ready-to-use, *hospital-clean* dishes in the finest food-service installations in all corners of the globe.

Thorough washing, rinsing and complete electric drying are all one can expect from a dishwasher. Hobart engineers have seen to it that these actions are the most efficient possible. *KitchenAid* is automatic . . . *nothing frees your hands quite so beautifully as a KitchenAid!*

KitchenAid takes the unpleasantness out of cleaning up after meals, while you spend the time doing the things you want to do with your family: entertaining, stepping out with your mate, going picnicking . . . or any of a dozen other things that make for more pleasurable family living.

The broad choice of beautiful decorator finishes offers complete compatibility with any kitchen color scheme. In addition to Stainless Steel, Antique Copper and White, your dealer can arrange for your particular color choice in front and side panels.

KitchenAid®

works better

because

it's built better

Large, heavy-duty racks slide independently . . . are cushion-coated for extra quietness and protection of tableware. The top rack adjusts to handle taller glasses or larger pots and pans. A five compartment silver basket accommodates ladles, spatulas and silver . . . complete dinner service is handled easily by KitchenAid.

New timed-spray cycle clears plumbing lines of water below recommended temperatures . . . warms interior of unit and tableware preparatory to the washing cycle.

The powerful, high pressure revolving wash action covers every inch of the spacious wash chamber with water far hotter than hands could stand. Cycle may be interrupted at any time to add a forgotten piece without water or detergent loss. Forced and circulated electrically heated air insures sparkling, sanitary drying.

When you put your dishes in a KitchenAid and press the switch, you can forget about them until you need them again. KitchenAid will do the complete job automatically, including storing dishes (out of the way and completely clean) until you want them.

There are eight models in the line, all with the same time-proven exclusive features.

load it!

. . . it's so simple, convenient, easy and quick.

latch it!

. . . press the switch. The neon light signals action.

leave it!

. . . your part of the dishwashing is done.

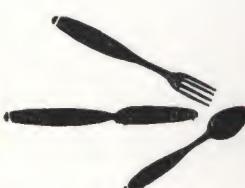

love it!

. . . everyone does . . . and you will too!

FEATURES

washes with powered water. 2½ gallons literally scrub your tableware at a pumping rate of 45 gallons a minute from an exclusive Hobart revolving wash arm. Timed spray cycle clears plumbing lines of cold water . . . raises temperature of tableware prior to wash action.

rinses twice with fresh, hot water. No weak splasher-type rinse spray, but fresh, hot water power-pressed—not once but twice—over your dishes from the revolving arm, completely rinsing all the tableware clean.

dries with circulated hot air. Forced over and around and into each crevice, the heat from the electric element is completely circulated by a separate power blower fan which dries your tableware thoroughly to a sparkling finish.

signal light and control dial. The manual control knob serves as an indicator, telling what operation is being performed. Cycles may be advanced manually by this control. New-style, long-lasting, neon signal light glows while unit is operating.

dual strainer system

This exclusive system prevents food spray-back. Stainless steel dual-strainer system filters all water as it is circulated through the revolving arm. Food particles are thoroughly stripped from dishes. Small soil is flushed away. Coarsestrainer lifts out for periodic cleaning.
